

# E.B. Horsman & Son

*The Electrical Distributor of Choice!*

## Process Instrumentation

### British Columbia Line Card

E.B. Horsman Process Instrumentation division provides quotations, application assistance, product selection, customer training and after sales support. Our manufacturing partners are top notch innovators with global presence and support. E.B. Horsman's branch network and stocking capabilities ensures that our customers are well served with local inventory and support.

### SIEMENS

*Ingenuity for life*

Siemens offers a best-in-class, comprehensive process instrumentation portfolio for the widest range of applications. Whether you want to measure pressure, temperature, flow or level Siemens has the right products for your industry.

Siemens Siwarex weighing technology offers complete weighing systems including load cells, static and belt scales and a wide range of electronics designed to complement and enhance your plant automation.

Banner Sure Cross™ networks offer industrial grade wireless solutions for the most demanding applications. From point to point systems to complex networks Banner Sure Cross™ have the right sensors for secure and reliable communications.

Gems Sensors & Controls have the capabilities to manufacture short-runs to mid or high volumes of your custom liquid level, pressure, and flow sensors, as well as switches and solenoid valves.

Pioneer in the manufacture and development of thermal dispersion mass flow technology. Portfolio includes switches for level, flow, interface and temperature

Pressure and temperature gauges and switches, pressure transmitters and diaphragm seals

Proximity sensors, fieldbus products, industrial cordsets and connectors, intrinsically safe barriers, industrial Ethernet, remote IO.

Gas and flame detection measurement. 3M Scott Safety includes Scott Safety, Detcon, Simtronics, GMI and Oldham brands.

Festo is a worldwide leading supplier of pneumatic and electric automation technologies offering industrial and process automation components and turnkey solutions.

Operator Interfaces, Signal Conditioners, digital Panel Meters for process, current, voltages, Thermocouples, RTD's & Strain Gage. PID controllers.

Since 1947, customers all over the world rely on Hach liquid analyzers for their accuracy, reliability and ease of use.

Shaft speed sensors, shaft speed switches, bearing temperature sensors, belt misalignment devices, vibration switches, position monitors for slide gates and valves, tilt switches, motor speed controllers, and complete hazard monitoring systems for processing plants.

Thermocouples, RTD's, Thermo wells and a wide range of temperature measuring assemblies.

Signal Conditioners, Electronic Field Bus Components.

Safety explosion protection devices and systems for use in the process control applications. Key applications also include fieldbus and industrial network components, lighting surge protection, and alarm management.

Valves, actuators & valve control products including manual ball valves & automated ball valve packages; actuators for the automation of industrial valves.
