

TERMSERIES Relay with 16A Contacts

TERMSERIES Relay Modules – complete modules consisting of a relay and a base with AC/DC/UC coils, available in different versions:

- With screw and tension-clamp connection
- AgNi contact, optionally with hard gold-plated contacts
- 1 and 2 COs (Form C contacts)
- Available multiple-voltage input: 24...230 V UC
- With various protective circuits in the input (free-wheel diode, RC element)
- Illuminated ejection lever

MultiMark Terminals and Wire Markers

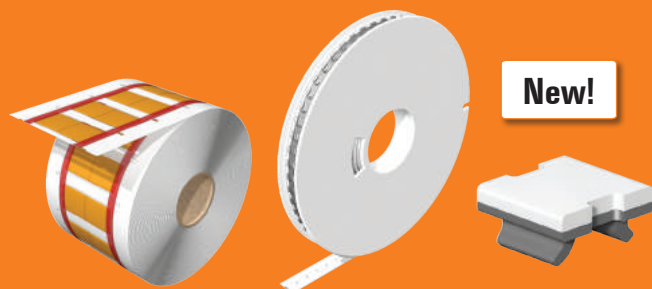

Benefits of the MultiMark:

- Compatible with Weidmüller terminal blocks
- Firm hold and durable printing
- Continuous strips save installation time
- Easy mounting thanks to an innovative composite material
- Space for multi-line printing

Tags and markers below only fit on the MultiMark Printer - THM MMP. See page 3 for details.

Push-In Technology HDC Kits

Hood, housing, male and female inserts and cable gland in a kit: one single part number.

Field tested Push-In technology for reliable connections. Solid or ferruled wires can be inserted by simply pushing them into the clamp. A small 2.5mm screwdriver opens the clamp to remove and also insert stranded wires. Bulkhead housing for 10, 16 and 24 poles with side or top entry hoods (PG 16 for 10 poles, PG 21 for 16 and 24 poles).

- CSA / UL approved for 600V AC/DC, 16A per pole

Cable Cutters

Cutting without deformation of copper or aluminium conductors

- KT 8: up to 8mm \varnothing , 16mm² / 6 AWG
- KT 12: up to 12mm \varnothing , 35mm² / 2 AWG
- KT 22: up to 22mm \varnothing , 95mm² / 3/0 AWG
- Cutting profile for different cable sizes optimizes the quality of the cut for smaller cross-sections to ease ferrule installation
- Not suitable for steel wires, steel-armoured cables, aluminium alloys and hard-drawn copper conductors!

Overvoltage Surge Protection and Monitoring

VARITECTOR PU II UL Series

- SPD according to UL 1449 Ed.4
- Installation-ready modules specifically for North American mains systems
- Higher SCCR of 200 kA

- Pluggable arrester
- Insert can be rotated through 180°
- Coded voltage level
- Versions for Single Phase, 3 Phase - Delta or WYE mains

VARITECTOR LOGGER 30

To protect your equipment and systems against damage from surge voltage, it is advisable to know how much load your protective elements are subjected to.

VARITECTOR LOGGER 30 registers current pulses that exceed a certain strength, which are discharged by your surge protection devices through the PE conductor. This reliably measures the load of your protective elements.

Swivel Head and Angled Tip Screwdrivers

Swivel Head Screwdriver is efficient, convenient and ergonomic!

Eliminate discomfort and blisters to the palm of the hand due to the spinning top.

- Slotted screwdriver with swivel head for ease of use
- 60mm long shank
- 3.5mm wide and 0.6mm thick blade
- Ideal for 2.5 and 4mm² screw clamp terminals

This special Angled Tip Screwdriver is specifically designed to be used with our screwless terminals of the Z and P Series. Compared to its straight counterpart, it provides a clearer view of the wire entry port for these blocks where the wire and clamp opening holes are on the same plane.

Its 3.0mm wide tip is ideal for opening tension clamp and Push-In terminals as small as 2.5mm²

Catalog #	Description	Regular Price	Special Price
9918110000	SD 0.6x3.5x60 pico SWIVEL HEAD	\$11.30 ea.	\$5.20 ea.
1323880000	SD TO 0.6X3.0 ANGLED TIP	\$13.10 ea.	\$8.90 ea.

MultiMark

All-in-one marking system for the entire cabinet

New!

The MultiMark printer marking system consists of the compact and modular THM MultiMark thermal transfer printer and an innovative line of reel formatted MultiMark markers to fit onto modular terminal blocks, wire and cable, and equipment.

The THM MMP is a thermal transfer printer with a sturdy, modular construction. Its key advantage is in the processing of continuous materials, fabric and polyester labels, shrink sleeves and PVC labels. Features label printing with optional cutting/perforation. The integrated cutting and perforating options allows the division of the continuous material into any length – this makes installation easier when cutting and finding the identification areas. The device is very simple to operate thanks to Weidmüller's interfacing software M-Print® PRO and intuitive touch display.

THM MMP printer

All-rounder THM MMP: the printer handles marking jobs that would otherwise need to be done by several different devices.

Benefits with MultiMark

- A printer for all jobs
- Ideal for small and medium print volumes
- Virtually maintenance-free thanks to thermal transfer technology
- Excellent readability (resolution: 300 dpi)
- Flexibility provided by modular perforation and cutting unit
- The constant pressure roller can be changed in 30 seconds
- High output, from 250 Dekafix markers/min.

Snap-on terminal markers are printed using a separate print contact pressure roller, which can be changed in just 30 seconds. Another plus: the device is very easy to operate thanks to an intuitive touch display and clear status indicators – in 22 languages. The compact design and low weight of 3.5 kg also ensures that the THM MMP really can be used anywhere, e.g. as a mobile printer for your on-site jobs.

Terminals Tags snap securely into place for all Weidmüller terminal blocks. With a marking system for terminal markers you expect the markers to be printed quickly and installed just as fast. Our new line of WS and DEKAFIX MultiMark markers also have a high resistance to shock and vibration. MultiMark terminal markers are made of an innovative composite of two material components. The hard base contour of the marker snaps securely into the connector. The elastic surface material makes the marker easy to mount across a long run of terminals.

This specially punched material enables the strips to be stretched to accommodate the slight variations in spacing that tends to add up with long terminal block configurations. Another advantage is the excellent printability of the surface material that guarantees durable and wear-resistant labeling. A print resolution of 300 dpi also produces an easy to read script.

Maintenance and Cloud Service

Efficient and secure machine maintenance
u-link makes remote maintenance easier and accelerates service processes

New!

More
Performance.
Simplified.

The remote maintenance of machines and plants is often designed such that it is very complex and time-consuming, and there is also the demand for a targeted and safeguarded functional connection to the associated IT systems. For many users, these two issues make the connection of plants around the world a major obstacle.

u-link guarantees quick and secure access to machines and plants, which makes remote maintenance easier while also allowing for the efficient management of production plants and user clients. The intuitive u-link interfaces are quick and easy both to configure and to adapt to specific processes. The innovative service on safeguarded servers in Germany also provides an online platform that ensures conformity between different IT systems when carrying out remote maintenance.

Easier plant access with security

u-link is the perfect remote-maintenance solution for OEMs and plant operators. You can maintain a very productive system, even without having any in-depth IT expertise. Quick, secure and simple.

Customised system management

u-link can be used to manage users, groups and their access rights based on individual requirements, such as a group assignment or access rights for production plants.

Reduced configuration effort

Thanks to the intuitive interfaces, routers and clients can easily be connected without the need for any in-depth IT expertise, which allows for the quick linking of multiple machines to the cloud service.

Secure remote maintenance and remote diagnostics

Machines and plants can be accessed remotely via a secure VPN connection, regardless of where they are in the world. The high level of availability of the servers based in Germany means that you have secure access to your production facilities at all times.

Status monitoring and status reports

With Weidmüller Heartbeat, router availability can be reported to u-link, allowing for status monitoring and reporting of the installed router.
