An established brand

PILA is the answer to the needs of those customers who are looking for affordable and yet reliable LED products. Our LED lamps are an excellent replacement for their conventional equivalents.

Benefits:

- Affordable/economical products
- Efficient
- Product portfolio dedicated to basic applications
- Guaranteed luminous flux and durability
- Simple conversion from conventional luminaires to LED
- Simple and quick assembly

The factory in Pila started production of traditional bulbs in 1958. Due to the transformation of technology into LED, the first PILA LED bulbs appeared on the market in 2014 and LED tubes in 2017.

In some European markets, PILA is a brand with high reputation and awareness among consumers (34% source: HeartBeat) and it's highly recognized in the professional market among installers.

Therefore, in 2018, we decided to expand the offer with a full category of economical professional installation fittings.
