

# KNIPEX-Cobra Water Pump Pliers

6 sizes for  
workpieces up  
to 120 mm

New product features of Cobra  
in 250 mm and 300 mm length:

- ▶ 30% expanded gripping capacity
- ▶ more comfortable hand position  
due to optimized fine adjustment
- ▶ improved access to the  
workpiece
- ▶ increased load capacity having  
a slim design

**NEW**

**KNIPEX** Quality – Made in Germany

# KNIPEX Cobra Water Pump Pliers

The Cobra grips firmly and securely also under rough conditions.

The special jaw design with opposing off-set teeth ensures maximum grip and perfect alignment. In addition the Cobra offers a unique adjustment mechanism: at the push of a button the tool adjusts fast and easily to the workpiece. No more guessing at the right size.

To the contrary: place the upper part of the jaw against the workpiece, press button and push the lower jaw into position. Simply perfect. The button serves as a memory button: an unintentional adjustment – even under load – is not possible. The fine adjustment always provides a favourable position of the handles. Also in this respect the ergonomically designed Cobra is particularly user friendly.

Gripping-surface with special hardened teeth  
= wear resistant and high gripping security

Self-locking on pipes and nuts  
= no slipping off the workpiece, no knuckle-busting

Push-Button-Mechanism  
= adjustment at the push of a button directly on the workpiece

Fine-adjustment  
= optimum adjustment to different sized workpieces

Box-joint design  
= directional stability

Guard  
= avoids finger-pinching

Handle cover  
= non-slip

Opposing off-set teeth provide a self-gripping effect which avoids slipping off the workpiece

Operation on pneumatic pipes

The Cobra XL (length 400 mm / 16") with a capacity of up to 95 mm / 3 1/2" exceeds by far the efficiency of a pipe wrench of the same length

Mini-Cobra: pocket size with adequate tool function. Capacity up to 30 mm diameter

\*MM with opening spring

- ▶ Push-Button-Action directly on the workpiece: fast and comfortable operation
- ▶ fine adjustment: allows optimum adjustment to different sized workpieces and a comfortable position of the handles
- ▶ secure catching of the hinge bolt: no unintentional adjustment
- ▶ box-joint design: high stability due to double guide
- ▶ self-locking on pipes and nuts: power-saving operation and no slipping off the workpiece
- ▶ gripping surfaces with special hardened teeth: wear resistant
- ▶ guard: prevents "knuckle-busting"
- ▶ favorable lever action: optimum power transmission
- ▶ forged from Chrome-Vanadium Electric Steel, oil-hardened: high load capacity
- ▶ **Cobra...matic:** with spring adjusted action for instant adjustment
- ▶ **Cobra ES:** particularly good access to the workpiece due to very slim construction of head and joint area
