QS30 Sensors

High-Performance, Long-Range Sensors

The QS30 is a line of specialized photoelectric sensors that have the ability to differentiate colors in low contrast applications.

- Right-angle, barrel- and side-mount sensors
- Specialized models for reliable detection of water or liquids containing water

Eight sensing modes for solving most applications: opposed, retroreflective, convergent, diffuse, plastic and glass fiber optic, and adjustable-field and fixed-field. High-performance sensing with visible, long-range Class 1 and 2 lasers with narrow effective beam for small object detection and precise position control.

Single push-button programming with five advanced sensing options for reliable detection of reflective objects.

QS30 Adjustable-Field

Background suppression models for detection of objects when the background condition is not fixed, and foreground suppression models for detection when background is fixed and object varies in color or shape.
