

AVAILABLE NOW AT E.B. HORSMAN & SON! Temperature Measurement Camera

Get temperature information within 300 milliseconds

The Opticom temperature screening system is equipped with an infrared camera and a built-in body temperature detection module, which can rapidly determine a person's temperature when they stand in-front of the camera.

The OPT-7MFTD solution includes a 7" high-resolution TFT screen with built-in high sensitivity thermometry that is accurate to within 0.5°F / 0.3°C. The ultra-high-speed system captures image and temperature information within 300 milliseconds and will generate an alarm response when the subjects temperature registers 99.1°F / 37.3°C or higher.

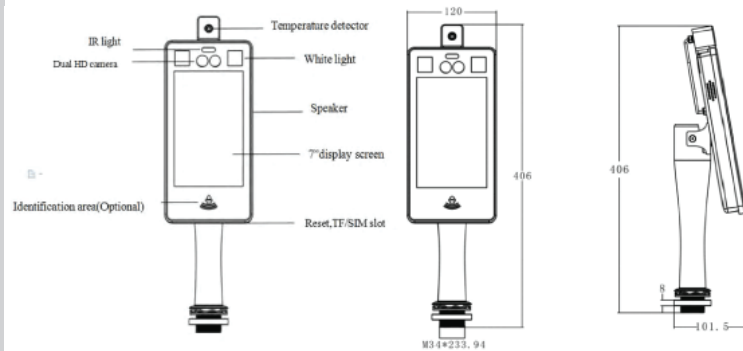

Alarm outputs can also be connected to access control systems that can control devices such as door locks and turnstiles. This ensures that businesses can safely monitor who may have symptoms, and adds an additional layer of protection for their staff and clients.

Highlights of the OPT-7MFTD

- Facial Recognition Detection: just under 10ft / 3m
- Forehead Temperature Detection: 10-15" / 25-40cm
- Alarm for Temperature over 99.1°F / 37.3°C
- Temperature detection error range +/- 0.3C
- Scans quickly to keep traffic moving
- Floor Stand, Desktop Stand or Turnstile options
- Can be used as a stand alone system that does not require a computer or network
- Can be used to lock doors based on temperature readings
- >99.97% Facial Recognition Accuracy

Applications

The OPT-7MFTD can be quickly deployed at facility access points and provides extremely accurate screening of both employees and customers for a wide range of applications including industrial, medical, and educational facilities, retail outlets, restaurants, and more.
